

HCRAI – Conference on Human Centered Regulation of Artificial Intelligence

Janos Levendovszky
vice rector of science and innovation

Human centered AI ?

“AI centered” humans
(researchers, SW engineers,
developers, tech firm CEOs ..)

- Developing novel algorithms and architectures
- Training the free parameters on a given data set
- Running performance analysis
- Application development

Intelligence is born out by algorithms
Knowledge is confined in the training set

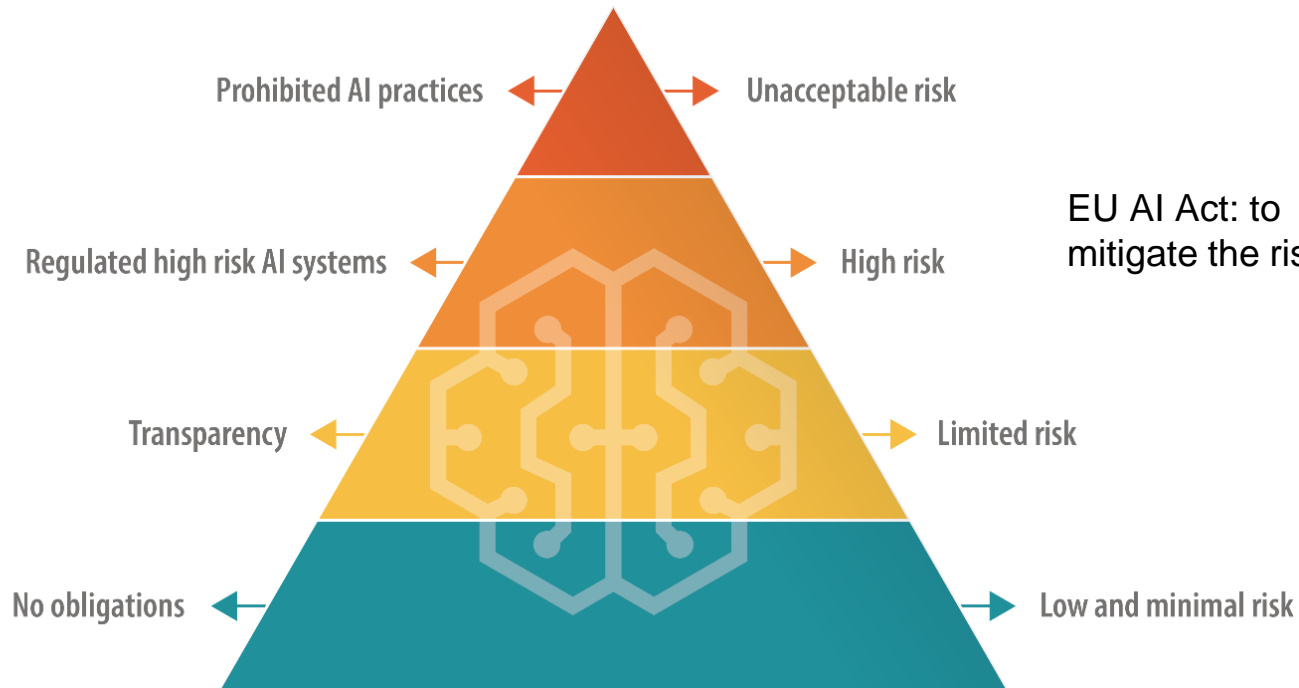

Projection of human qualities:

- Lawful
- Ethical
- Robust
- Trustworthy
- Benevolent

EU AI Act: to mitigate the risk

AI is to augment humanity ! It is a tool to empower human beings and enhance their capabilities not to replace them !

Source: B. Schneiderman

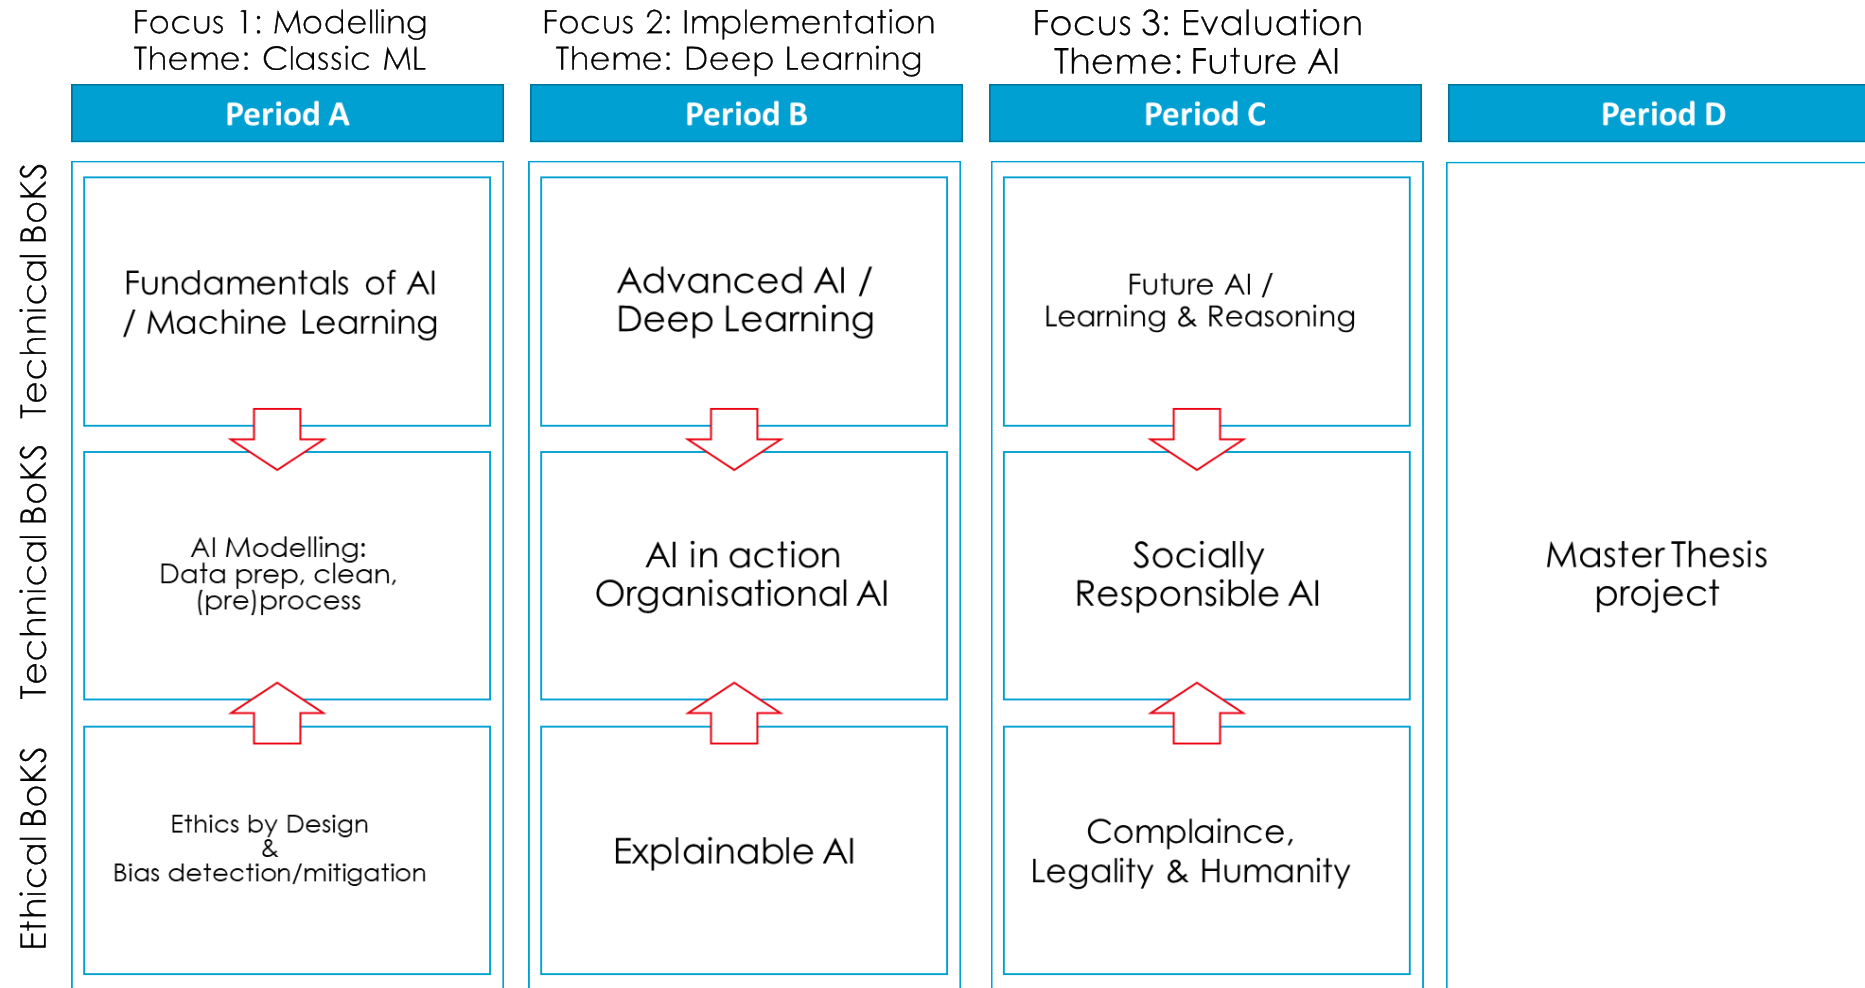

Design principles:

- social design,
- participatory design,
- inclusive design,
- interaction design,
- persuasive technologies,

60 credit – EU level HCAI
 Master program in the framework
 of *INEA/CEF/ICT/*
A2020/2267304 EU project
 presently with 40 students at BME

Curriculum

Fully available at the European Platform for Digital Skills and Jobs

HCAI in European Engineering Learning Innovation Science Alliance (EELISA)

EELISA is the first alliance of Higher Education Institutions from different countries in Europe meant to define and implement a common model of European Engineer rooted in society !

Elevating HCAI among the pillars of the EELISA European Engineer Profile !

Circular model

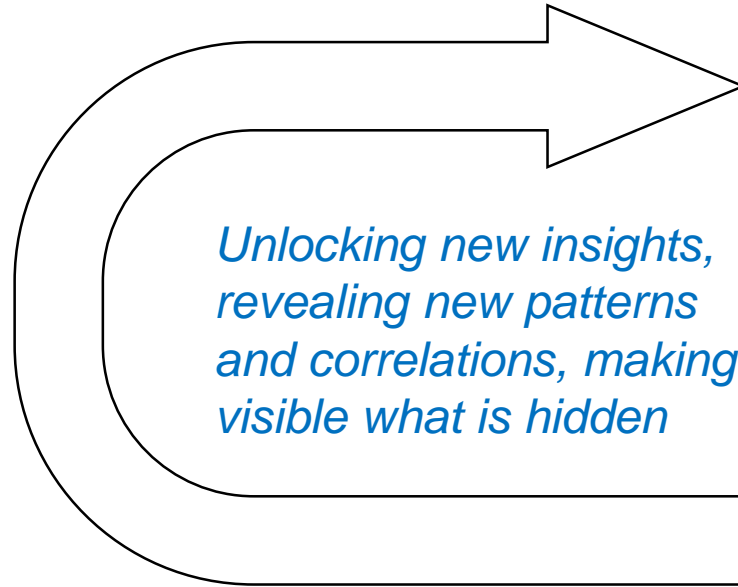

Benefit or shortcoming ?

Human Centered AI

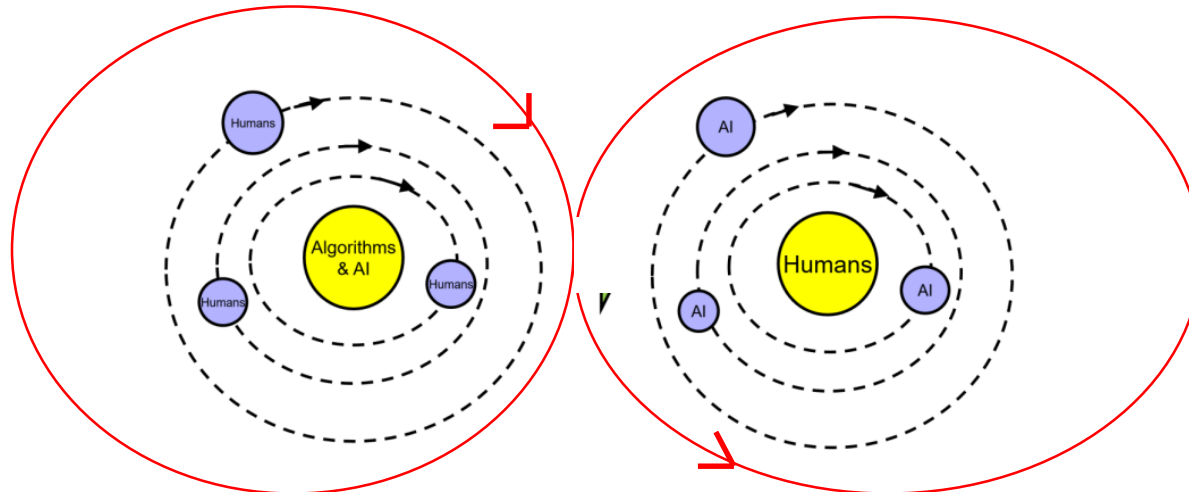

Expectation: no actions, usage or behaviour which are alien to human values

“AI centered” humans

willing to learn, accept and apply new insights provided by AI

THANK YOU FOR YOUR ATTENTION !
